

## **ATS Corporation Ranks Highly with Customers in Novarica ACE Rankings**

MCLEAN, VA —May 17, 2010, ATS Corporation (“ATSC” or the “Company”) (NYSE Amex: ATSC), a leading information technology company that delivers innovative technology solutions to government and commercial organizations, today announced that its property and casualty insurance consulting division received a high mark of 98 in the April 2010 Novarica Average Customer Experience (ACE) Ranking Report.

While ATSC ranked highly in all other categories – Technology, Staff, Organization and Functionality – the Company is most proud of the “Overall Customer Satisfaction” ranking of 99. “Our group’s mission is to go beyond simply providing services,” said ATSC Insurance Division Vice President, Janeen Blanton. “We want to partner with our clients to provide exceptional, ongoing value to their organizations.” That client focus is affirmed by a score of 100 that respondents would “definitely hire this service provider again” and “highly recommend this service provider to a peer.”

Novarica is a respected insurance technology research, consulting and advisory firm whose rankings are produced independently based on online surveys of senior technology and operational executives from at least five insurer clients knowledgeable about the provider’s services and employees.

“ATSC’s customers gave it the highest rankings that a technology service provider to the insurance sector has yet received,” commented Matthew Josefowicz, Insurance Practice Director at Novarica and creator of the Novarica ACE Rankings.

“We appreciate our clients for recognizing ATSC services and employees so favorably in the Novarica ACE Ranking Survey,” stated ATSC Chief Operating Officer, Sidney Fuchs. “While we are pleased with this high ranking, it also serves as a challenge to continually improve our offerings and deliver even greater value to our clients.”
