

ATSC Voyager

For Mission Critical Campus
& School Police Operations

Voyager

Secure Mobile Data Solutions for Law Enforcement & Public Safety

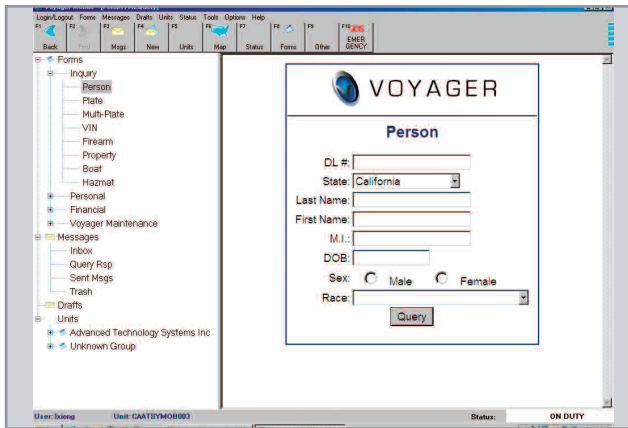

ATSC Voyager is a critical policing tool designed to support the unique requirements of Campus Police Departments. A multi-use campus police application, Voyager serves a variety of functions. Voyager allows campus and school police to proactively identify potentially dangerous visitors to prevent catastrophic incidents from occurring. Officers can access state and local criminal justice information as well as campus databases in real time. Voyager helps campus police forces operate more effectively from managing officer resources, to enhancing parking enforcement and citation issuance, and more. Designed for speed and ease of access, Voyager provides campus officers and departments an easy to use tool that effectively manages law enforcement operations and communications increasing officer productivity. Voyager accomplishes all of this with one goal - making campus and school environments safer.

Voyager also supports a range of communication options including a silent messaging capability that is designed for use in

emergency situations. Through the use of secure messaging, officers can be alerted and dispatched to hostile and dangerous situations in times of radio silence. In campus lock down situations officers can use Voyager on a handheld or laptop device to send critical messages and status updates to colleagues and command staff for actionable intelligence during potentially deadly situations.

The power of Voyager to access disparate databases further enhances officer safety and productivity. An officer can use Voyager to access pictures housed on a student ID database for identity confirmation. Using Voyager's multi plate query can also have beneficial affects on parking management and enforcement. By automatically cross checking multiple license plates in a single query with a campus parking database, an officer can check to see which vehicles have valid parking permits. Not only does this provide an increase in revenue with additional citations but it keeps the campus safe by alerting the police to dangerous outside presences on campus.

ATSC

Voyager supports Desktop and Laptop PCs and PDAs.

Features & Benefits for Campus and School Police

- Query criminal justice and student databases in real time
- Image access for immediate identity verification
- Real Time Messaging & Alerting for critical incident management
- Parking management and Citation Support
- Statusing for officer resource management
- Wireless Network Technologies including GPRS, EDGE, iDEN, CDMA, 1xRTT, EVDO, CDPD and 802.11. Ericsson and Motorola Private Radio Networks
- Information Sharing including inter and intra agency messaging, chat and database linking between agencies on shared servers
- CJIS Security including 140-2 certification and compliance. AES 128-bit or higher end to end encryption
- NCIC 2000 and NIBRS Compliant
- Instantaneous/Real Time Responses to queries eliminates the restriction of how many queries can be run simultaneously
- Extensive Transaction Logging of all queries for FBI and CTA
- Two - Factor Authentication

Multi-Agency Interoperable Mobile NCIC Software

- ✓ Fully FBI CJIS Compliant
- ✓ NLETS & CTA Approved
- ✓ Wants & Warrants
- ✓ Multi Database Query
- ✓ Images
- ✓ Field Data Collection
- ✓ Messaging
- ✓ CAD/RMS Integration
- ✓ Configurable Interface
- ✓ GIS/GPS Capable
- ✓ Fire and EMS Module

Device Independent

Voyager supports Desktop and Laptop PCs, PDAs and Mobile Phones.

Optimized for all Wireless Networks

Voyager is designed to run at the highest possible speed over all IP based Public or Private wireless networks, without the need for middleware. Agencies can run on dedicated or shared servers, based on IT management and budget requirements.

Delivering for Public Safety

The ATSC commitment to supporting government and public safety agencies is unparalleled. We call our approach "Service First." Whether you are looking to deploy a single unit on a shared server, an agency wide enterprise implementation, or a full outsourced solution, we can deliver.

Solution Management

- Device Set-up and Management
- User Set-up & Training
- CTA Wireless Access Approval support coordinated with your agency TAC officer
- Program Outsourcing for devices, carriers and custom development

Customer Support

"Service First" customer service with 7 day/24 hour/365 day support. ATSC provides comprehensive support including implementation, training and on-going technical and user support. Our "Service First" attitude makes us part of your campus police teams.
